

CITY OF SANTA BARBARA

COUNCIL AGENDA REPORT

AGENDA DATE: August 27, 2010

TO: Mayor and Councilmembers

FROM: Airport Administration, Airport Department

SUBJECT: Airline Terminal Project

RECOMMENDATION:

That Council attend a tour of the Airline Terminal Project at 500 Fowler Road at the Santa Barbara Airport.

DISCUSSION:

The Airline Terminal Project construction began in May 2009 with temporary improvements that included relocation of short term parking and the terminal loop road, and securing the construction area for the soil stabilization work and to prepare for the building construction.

In July 2009, when the temporary improvements were completed, construction began on the new terminal building. That project is now about 30% complete and the new building is taking shape. The new building is scheduled for completion in April 2011.

After the new building is occupied, the next phase will be the relocation of the 1942 portion of the existing terminal. The 1942 terminal, built by United Airlines, will then be relocated to the new terminal site and rehabilitated. During this final phase the new short term parking lot and loop road will be completed, with project completion by December 2011.
